#### Organization

The Niagara Parks Commission is governed by the Niagara Parks Act. Initially established in 1885, the Commission is an "Operational Enterprise" of the Province of Ontario and is responsible for maintaining, protecting and showcasing over 1,700 hectares of parkland stretching some 56 kilometres along the Niagara River from Lake Erie to Lake Ontario. The Commission is exempt from corporate income taxes under the Income Tax Act (Canada) and Ontario Corporations Tax Act.

#### 1. Significant Accounting Policies

### Basis of accounting

The financial statements of The Niagara Parks Commission (the "Commission") are the representations of management prepared in accordance with Canadian generally accepted accounting principles, consistently applied. Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of periodic financial statements necessarily involves the use of estimates and approximations. These have been made using careful judgement in the light of available information. The financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the accounting policies summarized below:

#### Revenue recognition

Income from gift shops, restaurants and attractions are recognized when merchandise has been transferred or services have been rendered. Income from land rent, commissions, rentals, fees and sundry are recognized over the life of the agreement or when earned.

#### Inventories

Inventories of saleable merchandise are valued at the lower of average cost and net realizable value.

#### Fixed assets

All fixed assets are recorded at cost. Depreciation has been recorded using the straight-line method, with rates from 2.5 to 33 per cent for buildings, roadways and structures, 10 to 33 per cent for equipment and furnishings and from 8 to 33 per cent for vehicles.

### Foreign currency translation

These financial statements are presented in Canadian dollars. Assets and liabilities denominated in foreign currencies are translated at the exchange rates in effect at the balance sheet date. Gains and losses on translation are reflected in net earnings of the period.

### Capitalized interest

The Commission capitalizes an amount of interest on all funds expended for those capital works in progress and financed via long-term financing.

### 2. Accounting Changes

Financial Instruments - Recognition and Measurement and Financial Instruments - Disclosure and Presentation. These new standards prescribe when a financial instrument is to be recognized and derecognized from the balance sheet and at what amount these financial instruments should be recognized. It also specifies how financial instrument gains and losses are accounted for. Under these new standards, all financial assets are classified as held-for-trading, held-to-maturity, loans and receivables or available-for-sale and all financial liabilities must be classified as held-for-trading or other financial liabilities. In addition, an entity has the option to designate financial assets or liabilities as held-for-trading or financial assets as available-for-sale on initial recognition or upon adoption of those standards, even if the financial instrument was not acquired or incurred for the purpose of selling or repurchasing it in the near term.

### 2. Accounting Changes - continued

All financial instruments are required to be measured at fair value on initial recognition except for certain related party transactions. After initial recognition, financial instruments should be measured at their fair values, except for financial assets classified as held-to-maturity or loans and receivables and other financial liabilities, which are measured at cost or amortized cost using the effective interest method. Financial assets classified as available-for-sale that do not have a quoted market price in an active market are measured at cost. Amortization related to financial assets classified as held-to-maturity or loans and receivables and other financial liabilities and unrealized gains and losses related to financial assets and liabilities classified as held-for-trading are recorded in net earnings for the period in which it arises. If a financial asset is classified as available-for-sale, the cumulative unrealized gain or loss is recognized in accumulated other comprehensive income and recognized in earnings upon the sale or other-than-temporary impairment.

The Commission has adopted the following classification for financial assets and financial liabilities:

- -Cash and cash equivalents are classified as held-for-trading.
- -Accounts and other receivables are classified as loans and receivables.
- -Accounts payable and other accrued liabilities and long-term financing are classified as other financial liabilities.

The new standards require all derivative financial instruments to be measured at fair value on the balance sheet, even when they are part of an effective hedging relationship. An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract, with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. If certain conditions are met, an embedded derivative is separated from the host contract and accounted for as a derivative in the balance sheet and measured at fair value. Upon adoption, entities have the option to recognize as an asset or liability all embedded derivative instruments that are required to be separated from their host contracts. As at October 31, 2007, the Commission does not have any material outstanding contracts or financial instruments with embedded derivatives that require bifurcation.

### 5. Post-Employment Benefits

Defined Termination Benefit

The Commission provides a defined employee future benefit, payable on termination to certain full-time employees with a minimum of five years of service. The benefit is calculated on the basis of one week's remuneration, at the time of termination, for every year of full-time service provided to the Commission to a maximum of 26 weeks. The accrued benefit liability as at October 31, 2007 is \$ 3,456,833 (2006 - \$ 3,294,058).

As a result of an actuarial valuation conducted in 2007 for the year ending October 31, 2007, it was determined that an actuarial gain of \$ 242,488 existed. The actual obligation as at October 31, 2007 is \$ 3,214,345 (2006 - \$ 3,359,635). Since the actuarial gain is less than 10% of the actual obligation, no minimum amortization has been recorded for the year.

The Commission requires that an actuarial valuation of the post employment benefits be conducted every three years. Therefore, the next valuation required would be for the year ending October 31, 2010.

Defined Benefit Plan Information	(In thousands of dollars)	
	2007	2006
	\$	\$
Employee benefit plan assets	_	_
Employee benefit plan liabilities	3,457	3,294
Employee benefit plan deficit	3,457	3,294
Benefit obligation recognized on the balance sheet		
Benefit obligation, beginning of year	3,294	3,116
Expense for the year	356	376
Benefits paid during the year	(193)	(198)
Benefit obligation, end of year	3,457	3,294

The main actuarial assumptions applied in the valuation of the defined benefit plan are as follows:

**Interest (Discount) Rate** – The accrued obligation and the expense for the year were determined using a discount rate of 5%. **Salary Levels** – Future salary and wage levels were assumed to increase at 3% per annum.

### Pension Benefits

The Commission provides pension benefits for all its permanent employees (and to non-permanent employees who elect to participate) through the Public Service Pension Fund (PSPF) and the Ontario Public Service Employees' Union Pension Fund (OPSEU Pension Fund). These are multi-employer plans established by the Province of Ontario. These plans are accounted for as defined contribution plans, as the Commission has insufficient information to apply defined benefit plan accounting to these pension plans.

The Commission's obligations related to the PSPF and OPSEU Pension Fund was \$ 1,541,361 (2006 - \$ 1,522,827) and are included in the administrative and general expenses in the Statement of Operations.

The cost of post-employment, non-pension benefits are paid by the Management Board Secretariat and are not included in the Statement of Operations.

### 6. Credit Facilities

The credit facilities, which have a maximum borrowing capacity of \$ 15,000,000, provide for two types of loans. There is a variable rate option with a rate which varies with the Bank of Montreal's prime rate and there is a fixed rate operating loan facility available for terms of 30/60/90/180 or 364 days at rates which are set relative to Banker's Acceptance rates.

#### 7. Commitments

The Commission is committed to spending approximately \$ 25,000,000 on capital projects in the next year.

### 8. Contingencies

The Commission is in litigation pertaining to certain claims for which the likelihood of loss is not determinable and the amount not reasonably estimable. Accordingly, no provision for these claims is reflected in the financial statements.

. Interest Expense	(In thousands of dollars)	
	2007	2006
	\$	\$
Interest income	(582)	(135)
Loan interest expense	913	440
	331	305
10. Depreciation	(In thousands of dollars,	
	2007	2006
	\$	\$
Depreciation of income producing assets	4,748	4,894
Depreciation of non-income producing assets	3,436	3,445
	8,184	8,339

### 11. Operating Leases

The Commission leases vehicles, equipment and premises under operating leases expiring in various years through 2011. The total obligation under operating leases amounts to approximately \$ 846,691.

Future payments for each of the next four years are as follows:

(In thousands of dollars)

	\$
2008	370
2009	290
2010	186
2011	1

### 12. Statement of Cash Flows

Changes in working capital components include:

(In thousands of dollars)

	2,919	(1,059
Accounts payable and accrued payroll	2,310	(796
Prepaid expenses	80	49
Inventories	35	(1
Accounts receivable	494	(311
	2007 \$	2006 \$

### Acquisition of fixed assets

During the year, fixed assets were acquired at an aggregate cost of 17,799,000 (2006 - 9,764,000) of which nil (2006 - 17,000) was acquired by means of capital leases. Cash payments of 17,799,000 (2006 - 9,747,000) were made to purchase fixed assets.

(In thousands of dollars)

Interes	

meresc	2007 \$	2006
Interest received	523	135
Interest paid	306	398

### 13. Financial Instruments and Risk Management

### Credit Risk

The Commission is exposed to a credit risk by its customers. However, because of the large number of customers, credit risk concentration is reduced to a minimum.

### Currency Risk

The Commission has cash of \$5,255,465 that is denominated in US dollars. This account has been converted to the Canadian equivalent at the rate of \$0.9325 US equals \$1 Canadian. The Commission realizes approximately 18.1% (2006 - 17.04%) of its sales in foreign currency. Consequently, some assets and revenues are exposed to foreign exchange fluctuations.

### Cash Flow Risk

The Commission has a variable rate bank overdraft facilities bearing interest which varies with the prime interest rate. Accordingly, the Commission is exposed to cash flow risks relating to potential fluctuations in market interest rates.

### 14. Capitalized Interest

The Commission has capitalized \$232,301 of interest related to the expansion of the Table Rock Complex which is likely to be completed in June 2008.

### 15. Surplus Funds

Pursuant to Section 16(2) of the Niagara Parks Act any surplus moneys shall, on the order of the Lieutenant Governor in Council, be paid to the Minister of Finance and shall form part of the Consolidated Revenue Fund.

### 16. Comparative Figures

Certain comparative figures have been restated to conform with the current year's presentation.
